

The following table shows how the “Tripartite Agreement in relation to arrangements at the interconnection point at Moffat (GNI/GNI (UK)/NGG)” demonstrates compliance with what SLC11A requires in terms of content for Access Rules.

SLC 11(A)	The Access Rules shall comply with the Regulation and must include, in particular but not limited to:	
SLC 11A(4)(a)	arrangements for maximising the available interconnector capacity, including:	
	<ul style="list-style-type: none"> the methodology for the calculation of interconnector capacity 	<p>Annex A Capacity includes the calculation methodology for interconnector capacity.</p> <p>Annex A 1.3 of Tripartite Agreement specifies where the Technical Capacity and IP Capacity available for Auction will be published.</p> <p>Annex A.8.1 and Annex A.8.2 refers to the joint method for maximising the amount of technical capacity at Moffat.</p>
	<ul style="list-style-type: none"> the provision of virtual capacity for a counter-flow of gas on the interconnector 	<p>Clause 2.6 (b) outlines that virtual capacity is only possible for counter-flow to the extent that Nominations and Allocations in the direction of offtake of gas from the GNI System and delivered to the NGG System are Nominations and Allocations of a greater amount in the opposite direction.</p>
	<ul style="list-style-type: none"> the volume of capacity offered on a firm basis and any additional capacity offered on an interruptible basis to maximise cross-border trade 	<p>Annex A.1 specifies arrangements for bundled capacity; interruptible capacity; and capacity maximisation. The technical capacity is published on the parties websites and the available capacity is published on the booking platform.</p>
SLC 11A(4)(b)	arrangements for users to obtain interconnector capacity at appropriate timescales, including, where relevant, the auction rules and procedures for nominating gas flows against the capacity	Annex A - Capacity outlines transportation arrangements information for obtaining interconnector capacity.
		Annex B - Nominations outlines nominations’ arrangements for nominating gas flows.

SLC 11A(4)(c)	arrangements for the management of congestion, including procedures for licensees to resell or make available to other users unused interconnector capacity and for users to transfer or resell interconnector capacity	Annex A – Capacity outlines the rules for congestion; <ul style="list-style-type: none"> • Surrender of capacity - Annex A 3.14, 3.18, 3.19(c). • Transfer of capacity between shippers on the secondary market - Annex A 3.15, 3.18, 3.19(b). • Annex A.3.2 states that capacity will be made available in amounts which comply with the CAM code (the CAM code acknowledges capacity that is made available through over-subscription and long-term UIOLI)
SLC 11A(4)(d)	arrangements in the event that the licensee curtails, withdraws or is unable to provide available capacity	Annex B – Nominations (specifically B.3.6(a)) points to procedures for compiling an Exit Flow Profile in the event of a curtailment, withdrawal or inability to provide capacity.
SLC 11A(4)(e)	arrangements for any ancillary services, such as balancing arrangements, including where these are offered by third parties, including agents	N/a; GNI as TSO balances the GNI Transportation System.
SLC 11A(4)(f)	any general terms and conditions that a user must accept in order to obtain interconnector capacity	Annex A3.18 requires that for any shipper to participate in auctions etc they need to sign up to PRISMA terms and conditions. In order to fall within the definition of GNI Shipper for the purpose of the Tripartite Agreement, a Shipper must have adhered to the GNI Code of Operations.
